## The Payment Module

The payment is a page where we can view the member contracts that the gym currently has, in this module we can do the following activities.

1. View available contracts that members have through a table detailing related information

2. Search for specific items by entering the reference number of the contract or the member id tied to the contract.

3. Record a contract, through the record button a record window would be displayed detailing the required information the entry needs to be inserted into the database.
